Multi-purpose West Africa service upgrades frequency

Multipurpose shipping line SafmarineMPV has upgraded its SAFWAF multi-purpose shipping service (connecting South Africa and West Africa) from six-weekly to monthly sailings.

This not only provides shippers with higher frequency but also extends port coverage through inducement into the Central West Africa port range (Cameroon to Ivory Coast), according to line management.

Core ports of call on the service are Walvis Bay, Durban, Cape Town, Sonils (Luanda), Matadi, Pointe Noire and Port Gentil.

The service upgrade takes effect in early April with the Safmarine Longa Voyage SA 15002.
